

# Collaborative Data Life-cycle Management (CDLM) for Petascale Projects

Arun Jagatheesan

iRODS.org, DICE, SDSC/UCSD

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# Agenda

- Introductions
- LSST as use case
- CDLM
- Attributes of CDLM

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# History behind the story

- **MDAS (Massive Data Analysis System)**
  - Support data-intensive applications that manipulate very large data sets by building upon object-relational database technology and archival storage technology
  - 1995 by DARPA
- **SDSC SRB (Storage Resource Broker)**
- **iRODS**
  - Flexible license for our community
  - Flexible rules for users
  - Flexible data management

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# My role in iRODS Community

- Large-scale usage and adoption of iRODS
  - Research and Analysis of large-scale use-cases
  - Design requirements for large-scale users
  - Consult on iRODS-based storage infrastructure
- Community Growth
  - Tutorials, dissemination
  - iROD-Chat (2006), SRB-Chat (2003)
  - Academic and Industrial users

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# Large Scale Synoptic Survey

- Survey entire sky every 3 nights
- Dark Energy, Dark Matter, Near Earth Asteroids, and more
- World's largest digital camera (3 billion pixels)
- Images 3000 times wider than Hubble
- Data from Chile to US and rest of the world
- 15 TB/night, over hundred(s) petabytes
- [www.youtube.com/watch?v=LtMJ\\_WwvBb8](http://www.youtube.com/watch?v=LtMJ_WwvBb8)

THE UNIVERSITY

# Data Products

QuickTime™ and a  
TIFF (Uncompressed) decompress  
are needed to see this picture.

- Releases
- Cataloged database
- Provenance Info
- Metadata
- Processed Data Sets
- Raw Images

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# LSST Data Infrastructure Layout

# LSST CDLM Problem Statement

- LSST data-lifecycle management infrastructure for:
  - Performance oriented data storage sub-systems
  - Capacity oriented data storage sub-systems
  - Data (usage oriented) distribution networks
  - [Provenance and archive storage systems]
- **Confluence of three major storage dimensions**
  - HPC data processing (pipelines to produce our data)
  - Datacenter sharing (data centers that host our data)
  - Data delivery and distribution (usage of our data)

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# CDLM

- **Collaborative Data Lifecycle Management**
  - Multiplexing of a single data life-cycle amongst more than one autonomous partner
  - Attributes of data-lifecycle is shared
  - Varying levels of autonomy and inter-dependence

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# Multiplexing a Data Life-cycle

- Data Creation (Raw data)
- Data Processing (Derived data)
- Data Analysis (Data warehouse, ..)
- Data Namespace
- Data Dissemination
- Data Provenance
- Data Archival

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# Levels of Collaboration

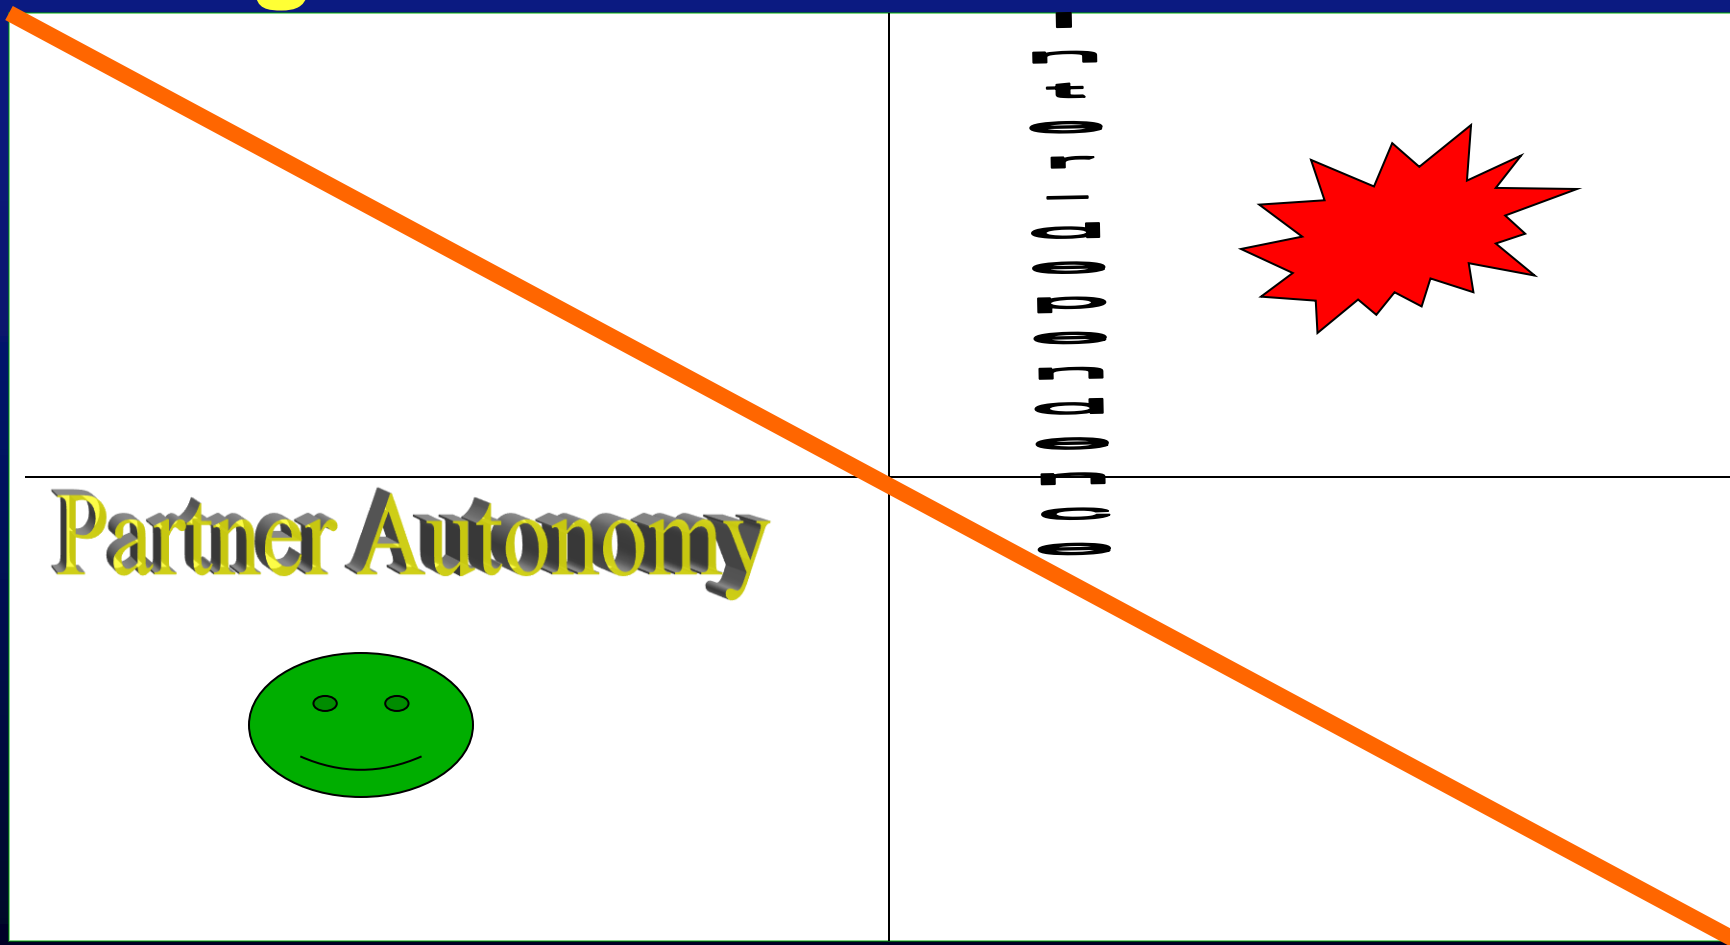

- Collaboration on Data Life-cycle not necessarily mean collaboration of businesses
- Some types of CDLM
  - Symbiotic - All partner businesses benefit from CDLM
  - Neutral - No effect on businesses due to CDLM
  - Competitive - partners of CDLM are actually competitors of the resulting business process (forced to have a common platform to compete)
  - Hybrid - Multiple or transient partner relationships

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# Autonomy & Inter-dependence at right levels for CDLM to work

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# LSST Data Layout

at CHAPEL HILL

THE  
NATIONAL  
ARCHIVES  
ARCHIVES.GOV

# CDLM Infrastructure Design

- Requirements, Expectations and Performance Management
- Minimize dependencies (without affecting cost)
- Reduce individual autonomy into hierarchical groups (that can remain autonomous)
- Hierarchical rules and community rules

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# iRODS enabling CDLM

- **Global Namespace**
- **Resource allocation and service levels as policies/rules**
- **Hierarchical rules and access controls**
- **Highly Flexible System**

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

# Similar projects? Let's talk

- The power of the community
- Not necessarily “large” scale
- Symbiotic
