

# Deep Dive into Ceph

... and how to use it for iRODS

---

**FOUNDED IN 2012**

SOFTIRON IS A VENTURE BACKED COMPANY

**TASK-SPECIFIC**

**DATA CENTER SOLUTIONS**

---

**50** STAFF  
MEMBERS  
& GROWING

**\$40M+**  
EQUITY RAISED

FROM HIGH NET  
WORTH INDIVIDUALS,  
INSTITUTIONAL INVESTORS  
& PRIVATE COMPANIES.

---

**WE ARE A GLOBAL COMPANY WITH OFFICES IN**

UNITED STATES OF AMERICA • UNITED KINGDOM • CZECH REPUBLIC • AUSTRALIA • NEW ZEALAND

---

# Fully supported – any Ceph, any location

Skillset limitations  
Strategic open source infrastructure adoption  
Mixed cloud native/traditional workloads  
Secure Provenance

## HyperDrive

Lack of on-site expertise  
Low space/heat/dust control

## HyperDrive

Power economics  
Remote locations

## HyperDrive

Unamortized hardware  
Production Ceph deployment

## HyperSafe

**HyperDrive – where hardware matters most**  
**HyperSafe – best in class enterprise Ceph support**  
**SoftIron – the only vendor that can do it all**

## HyperDrive

Power restrictions  
Shock/vibe ruggedness

## HyperDrive

Power restrictions  
Shock/vibe ruggedness

# Built on Open Source

**Ceph is the Swiss Army Knife  
of the SDS world**

Ceph has that Linux-like magic combination of qualities that heralds its destiny: accessibility, openness, unparalleled flexibility, rich features, an impressive and growing roster of enterprise ambassadors, and a deep and devoted user community.

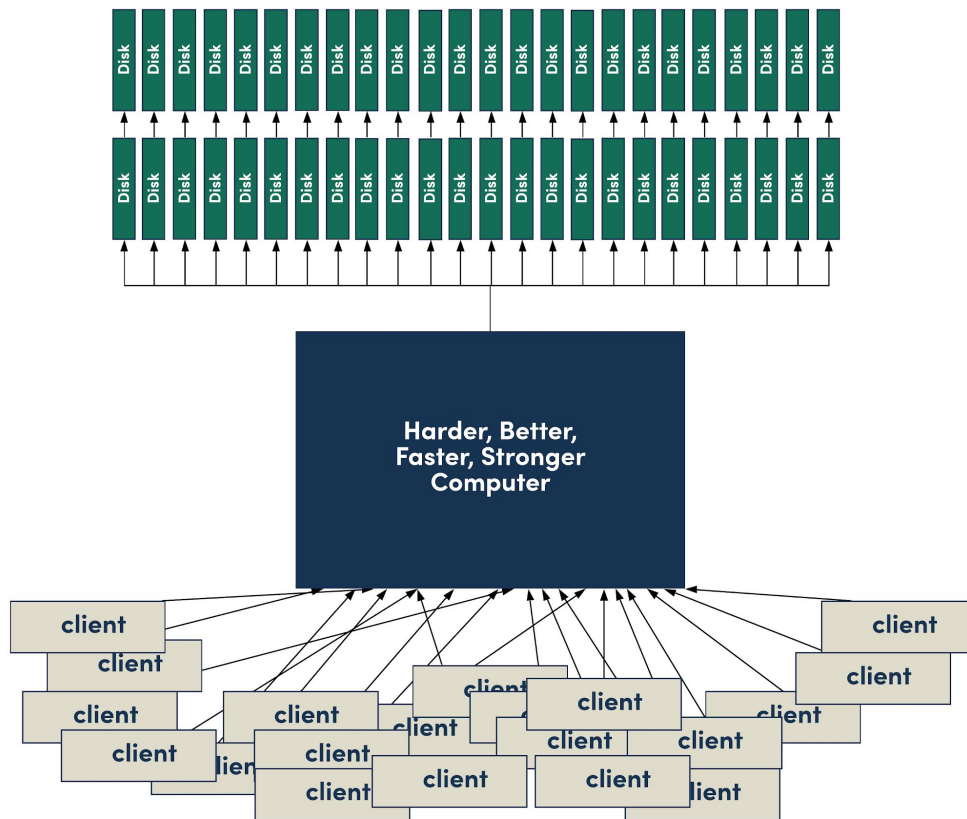

# Traditional Storage Architecture

# Traditional Storage Architecture

# Scaling Up

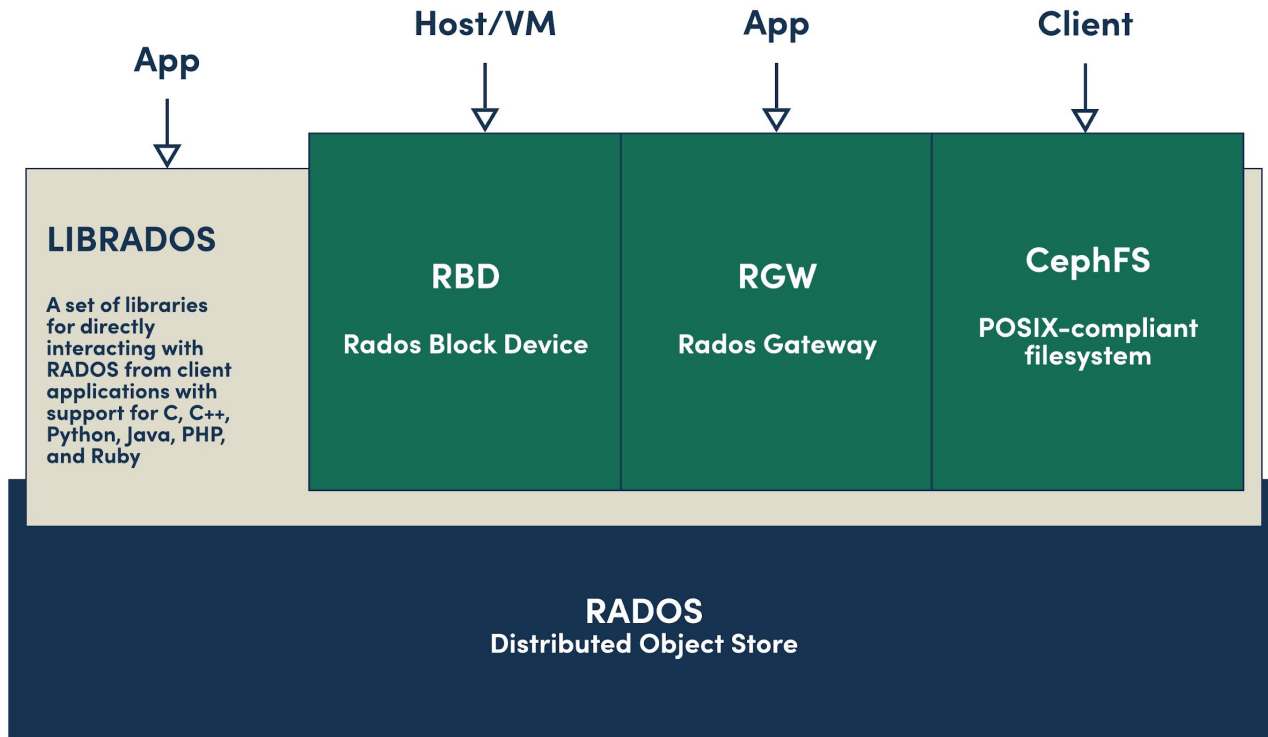

# Scaling Out (SDS)

# Ceph Architecture

# Ceph Daemons

**OSD**

**Monitor**

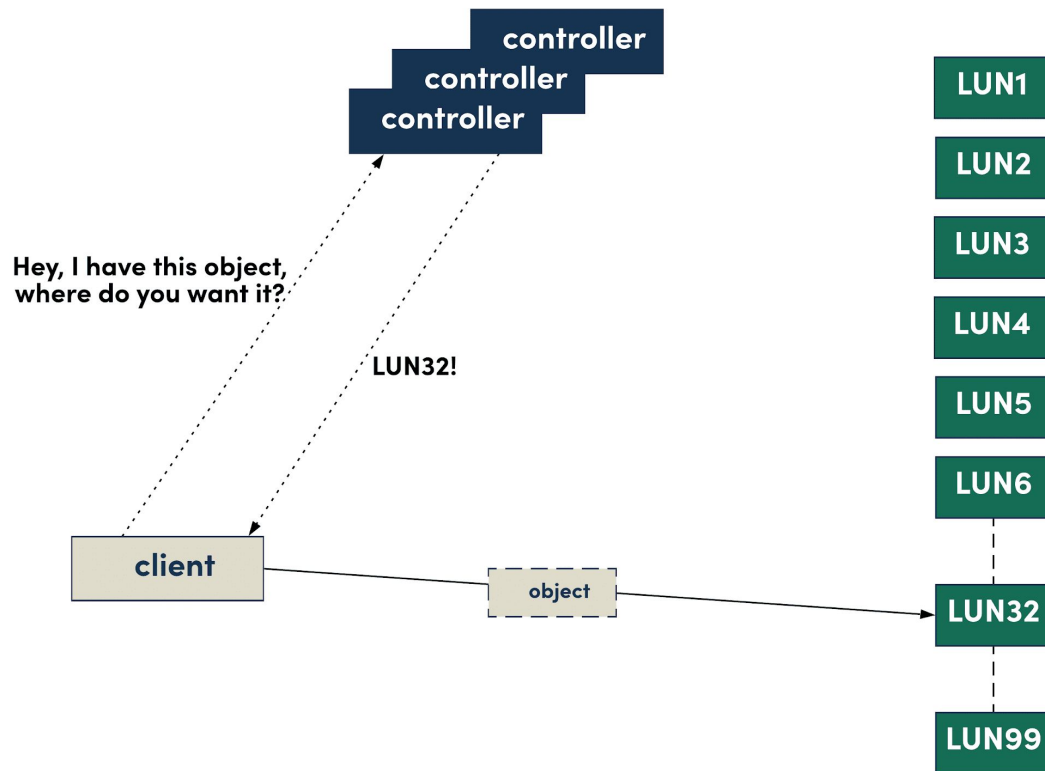

**Manager**

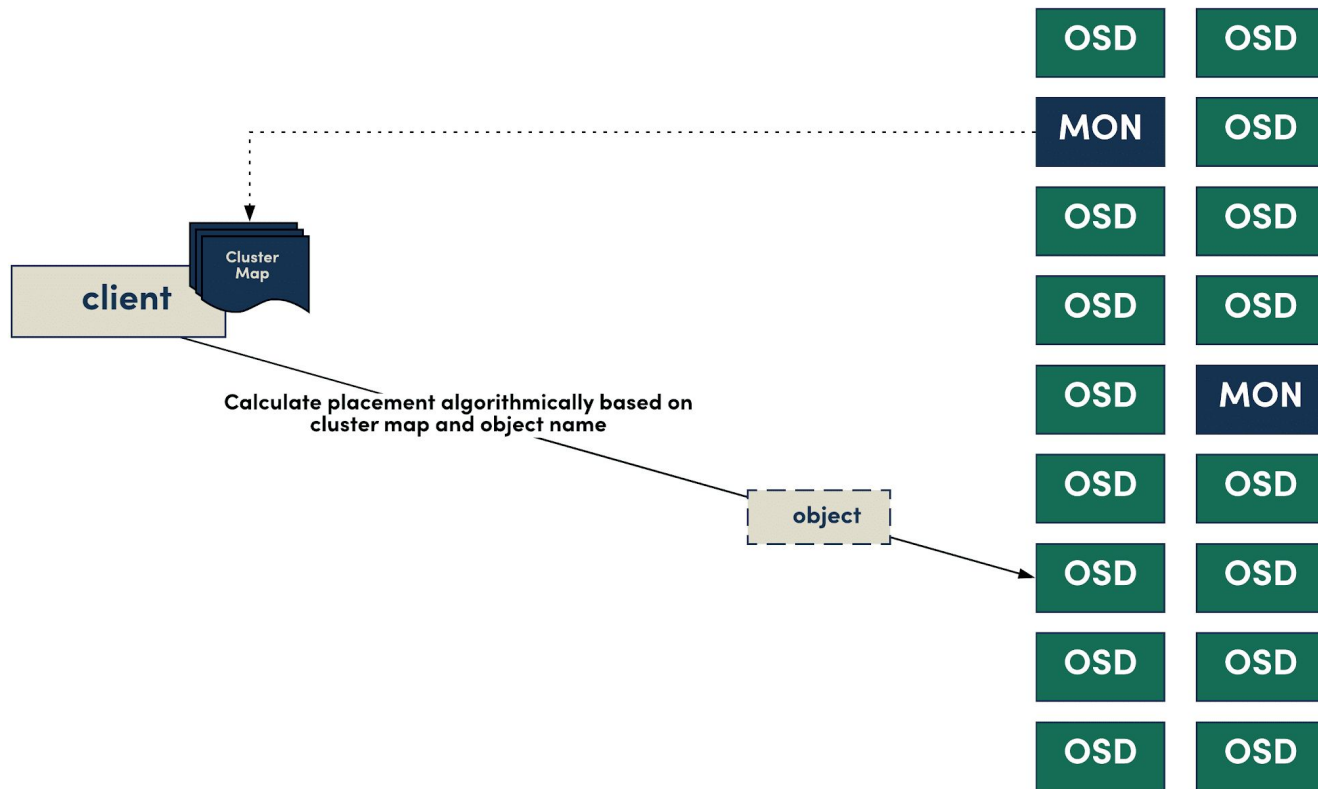

**RGW**

# Traditional Data Placement

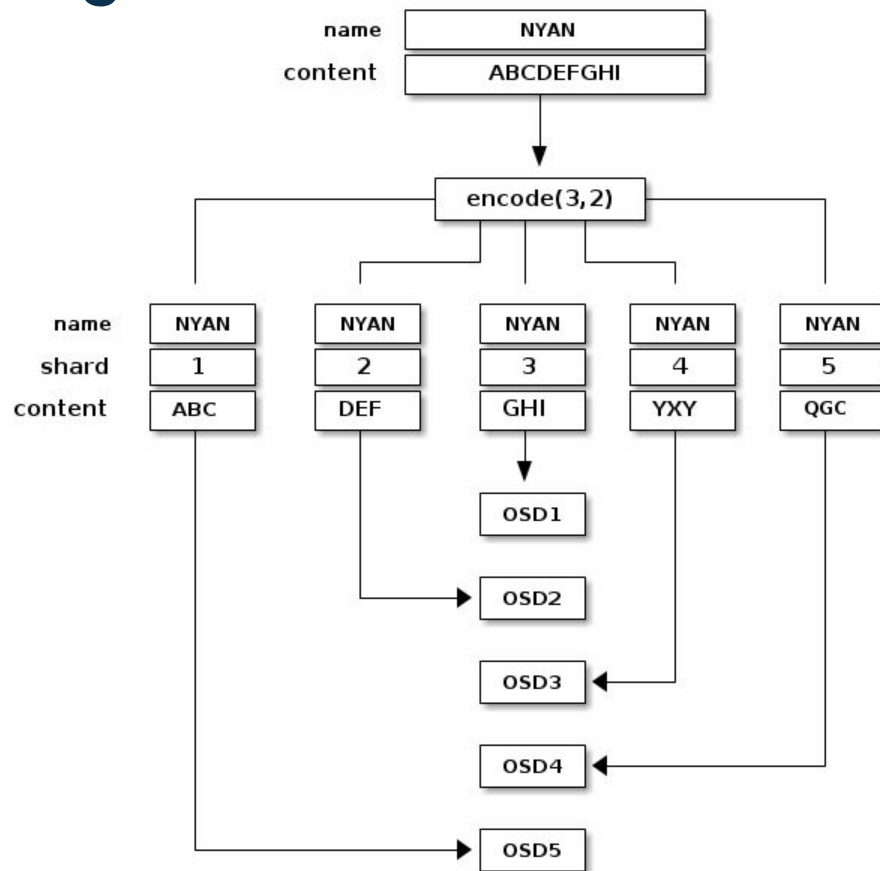

# CRUSH

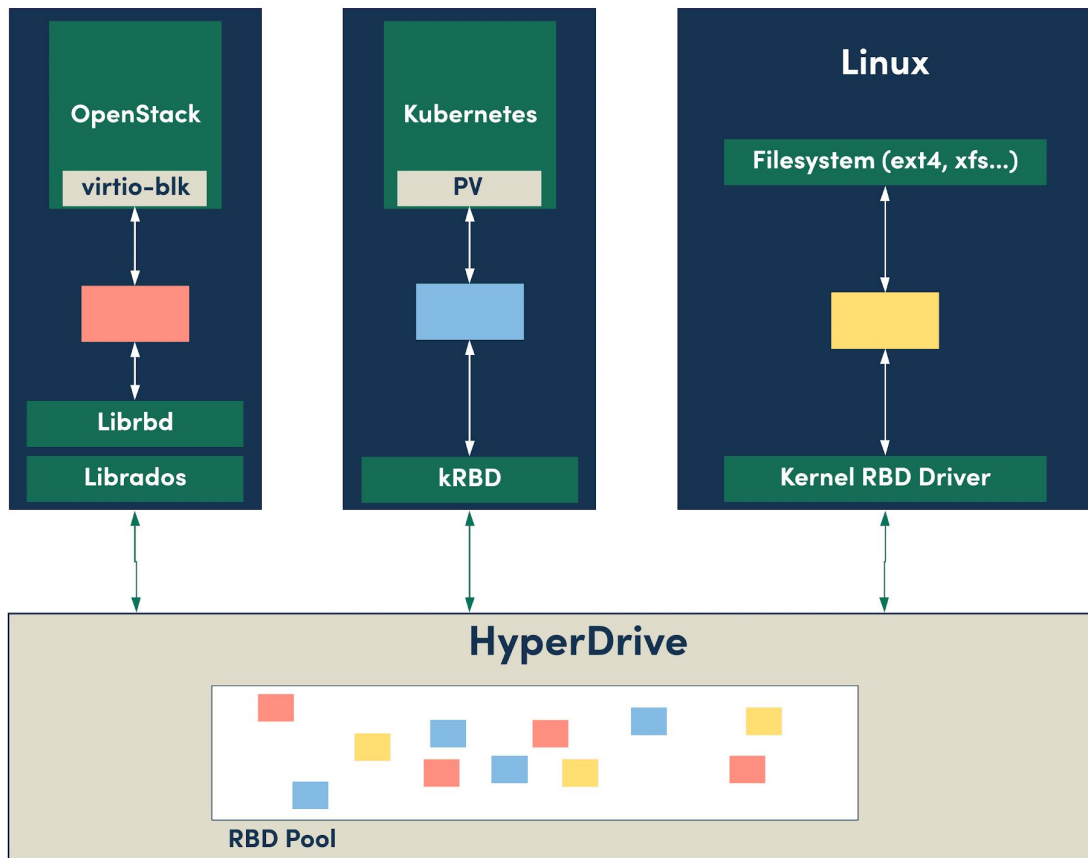

# Placement Groups

# Erasure Coding

# RBD

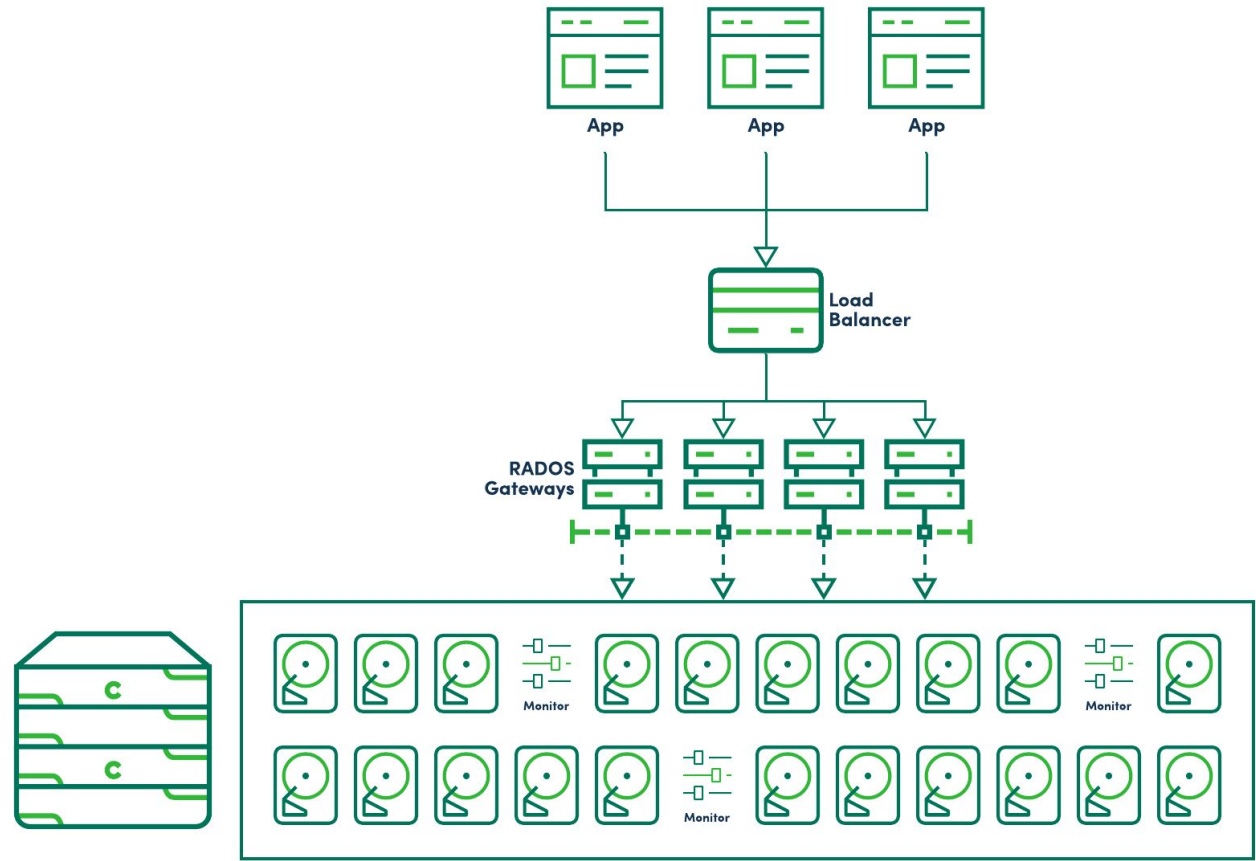

# CephFS

# RGW

# Recent releases and key features

## Nautilus - March 2019

- Easier to use and manage Placement groups
- Encryption in transit
- Improved S3 performance due to backend server replacement

## Octopus - March 2020

- S3 Bucket Replication
- S3 Bucket Notifications
- S3 Object Lock

## Pacific - March 2021

- New and official Ceph RESTful API
- Multiple CephFS Filesystems
- CephFS Windows Support

## Example – Enterprise Class Storage needs integrated management

---

- Eliminate the need for “command line warriors”
- Hardware auto-discovery wizard
- Rules to prevent bad setups and prompts
- Quick physical location of the actual disc that needs attention
- Easily add or remove machines to a cluster
- Multiple admin “lockout” feature
- ONLY possible with task specific hardware

# iRODS Integration

## S3 Resource Plugin

Can address Ceph just like any other S3 interface in iRODS

## UnixFilesystem Resource Plugin

Can mount CephFS (or even RBD) straight into iRODS via Unix

## RADOS Resource Plugin

Works, but hasn't been updated in a couple of years

Had some issues recently, which have been fixed
